AutoRun Typhoon Cracked Accounts is a compact Windows application built specifically for helping you design professional CD/DVD presentations by embedding buttons, list and text boxes, Flash animations, webpages, slideshows, images, and videos. Although it comes bundled with many dedicated parameters, the layout is clean and intuitive. A new project can be created by providing details about title and company name, picking an icon (ICO, EXE), and choosing a solid background color or uploading an image from the computer. Additionally, you can add background music (MP3, WMA, WAV, MIDI), protect your project from unauthorized viewing by setting up passwords or inserting a serial number or licence agreement, as well as insert a new program to be installed while running the current project. AutoRun Typhoon comes packed with a wide range of customization options for helping you build CD/DVD presentations, as you are allowed to add multiple actions for each project. Hence, you can open a document and new menu, display an image as a splash screen, open a folder and webpage, play a slideshow of images, Flash animations, audio files, clips, and videos, as well as extract archived files. When it comes to creating a new menu, you are allowed to insert buttons, labels, images, text messages, drop-down and list boxes, volume slider, Flash animations, webpages, audio files, slideshow, and videos. Plus, the objects can be moved by simply dragging and dropping them on the desired workspace, and you can change the button size and style, select between various menu templates, and customize the text. Last but not least, you can preview the project, test each action, and burn the project on CD/DVD or export it to EXE file format. As a conclusion, AutoRun Typhoon offers excellent output results and various customization options for creating CD/DVD presentations. WiseUtils 10 Keygen Free

KEYMACRO is a utility designed to help you create macros in Microsoft Excel. With this program, you can insert up to 25 macros in each Excel sheet, and specify the conditions that need to be met before each macro is executed. To begin, you are required to either select a project from a list of existing files or insert the first file in the project. Once the file is added to the project, you are allowed to modify its name, include additional files, choose the number of macros to be inserted, and add a title and description for each macro. When it comes to creating a macro, you can embed text messages, buttons, images, webpages, flash animations, videos, images, and slideshows. Besides, each macro can be assigned a name, create a new menu, and make the objects move and resizeable. Moreover, you can easily execute the macros and check whether each condition has been met or not. Additionally, you can insert a help topic into each macro, export a project into an Excel file, save it under a different name, or restore the project from a saved state. As a summary, the program lets you create useful macros for Excel documents. MARVIN Description: MARVIN is a simple and intuitive application which helps you create multiple folders and sub-folders in Windows Explorer. With this program, you can create folders and sub-folders, add files and sub-folders, and specify the name, type, and location of each folder. Once the folders are created, you can insert icons, customise the file size, rename, and add or remove users to be the owner of each folder. Last but not least, you are allowed to specify that each folder can be moved to a different location. Moreover, this program offers a powerful interface for creating, editing, and deleting a folder. It also allows you to specify how the folder will be displayed, which will give you an insight on its name, location, and size. In addition, you can save the project in a different location, add notes, and export it as an image file or PDF document. As a conclusion, MARVIN is a useful program for creating multiple folders.
