Here's my starting point: What I'm trying to do is move this smaller path so that it starts from the midpoint of the path: Is this possible? A: You can calculate the midpoint by dividing the width and height of your path by 2. To get the position of midpoint use.getBBox() var path = document.getElementById("myPath"); var bbox = path.getBBox(); var midX = parseInt(bbox.x + bbox.width / 2); var midY = parseInt(bbox.y + bbox.height / 2); path.setAttribute("transform", "translate(" + midX + "," + midY + ")"); document.body.innerHTML = "New midpoint: " + midX
