When you have a collection of photographs that you want to edit, prepare a folder (such as the one in the "Exposing your Photos" section earlier in this chapter). Create a new document in Photoshop and then drag the photos into it. Save the document, as explained in the "Using Photoshop for a variety of tasks" section later in this chapter. One of the most important advantages of working with photos in Photoshop is the ability to preview the image before you make any editing changes to ensure that you get the look you want. When you open a photo in Photoshop, you see a default Photoshop view — a small thumbnail of the photo set at a specific size and resolution. As the computer's file sizes continue to grow, you may find you need to shrink the file size of your photo to avoid huge files. Fortunately, Photoshop now has the ability to automatically reduce file sizes. Simply hold the Ctrl key and click once on the image. After a few seconds, you see the little icon for reducing file size; click that icon, and the image is reduced to less than 50 percent of its original file size. You can then improve your photo (or, if you're unsure whether you have the image file size you want, just copy it to a different file). Consider the following guidelines when editing your photos in Photoshop: Choose Edit⇒Enhance⇒Adjust Lighting. After you perform this edit, you should be able to adjust the image as desired. Choose Edit⇒Adjust Color. This process adjusts the colors of the image. Use the sliders and other tools in the dialog boxes to fine-tune the colors. Choose Image⇒Adjustments. Use the sliders and tools to adjust the contrast, color saturation, and other attributes of the image. This process is detailed in the section "Adjusting Your Images in Photoshop" later in this chapter. To clean up a family portrait, which often suffers from faint smudges and other minor problems, I offer this process for you in Figure 12-2. First, I apply adjustments to the image. Then I use Color Splash to make the image look like it's been splashed with paint. I use a brush to work in the areas that I don't want to splotch. Finally, I use the Eraser tool to get rid of the faint smudges on the skin. Photoshop Elements offers a number of editing features that are similar

trial has to be "just."... Moreover, `the general and vague right of personal liberty, vested in all English-speaking peoples, against oppression in the hands of government, is a principle of which this [United States] is the acknowledged champion. 120 W.Va. at 284-85, 195 S.E. at 465. 21 "The term `disability' means any mental or physical handicap, infirmity or malformation, whether arising from birth, accident, infection during pregnancy, illness or any injury suffered by the individual, which may be permanent or temporary, and shall be construed to apply to a handicapped child as defined in the federal regulations pertaining to special education." 22 The West Virginia Supreme Court of Appeals in Harris v. West Virginia Public Employees Insurance, 330 S.E.2d 826, 831-32 (W.Va.1985) set out the definition of "handicap" as including mental as well as physical impairment: The word `handicap' is to be broadly construed in the area of public insurance. It is commonly understood to mean any condition that limits a person's capacity, ability, or productivity to do a job or to fulfill a social or occupational role. This includes mental, physical, sensory, or mental conditions that limit a person's capacity to do a job, to perform a particular role, to meet legal standards, or to cope with life's ordinary demands. The word `handicap,' or mental as well as physical impairment, may be discussed in several ways. To be considered `disabled' under the federal definition, [the mentally retarded] must be mentally retarded. For purposes of this... case, mental impairment is defined as the inability to establish... [a] mental capacity to perform certain jobs." 23 The principal question presented to the panel was the "applicability of West Virginia's Equal Rights Amendment to the determination of employment discrimination against handicapped persons." 330 S.E.2d at 830. The circuit court had granted the insurance company's motion to dismiss the plaintiffs' equal protection claims on the grounds that the Equal Rights Amendment specifically guarantees equal protection rights only to "persons," a term not defined in the constitutional language and one that must be construed as being synonymous with "citizens" (the plaintiffs are not West Virginia citizens). In affirming the circuit court on this point, the Supreme Court of Appeals noted that any protection for handicapped workers, as against employers

3 Reasons You Should Invest In Long-term Care Insurance If you're a young adult, you're probably forgetting about the aging process. Senior citizens, on the other hand, have a certain confidence built in their lives as they walk around the area and stop at the store. But, what happens after the senior citizen turns 65? How exactly do they make sure they can keep living the way they have been? In case you haven't thought about that, you should. One of the most important things to do is to invest in life insurance. As a young adult, you should build insurance policies into your lifestyle. With all the major trends, like having a family, you might find yourself running out of time to invest. There are a few cases where it's too late to start looking into life insurance and you end up with no insurance policy in your life. You shouldn't forget about it even though you're only young, you're not too old to start looking into it either. You want to be prepared for the cases where you can't invest into it. Even if you're young and want to start investing into life insurance, you should start looking into long term care insurance, too. Don't forget that after you turn 65, it's your time to start thinking about ways to keep yourself living. You might also have a need for advanced care if you end up with a terminal disease. Here are three reasons why you should invest in long-term care insurance: 1. It's available. Not every insurance policy is available to everyone. Many are tied with medical companies as well, which means that many people can't get it. You want to be sure that whatever you do with your money, the insurance company can at least cover it. You need to make sure that this is in the case of you turning 65 and not being able to afford the lifetime care you need. 2. It provides flexibility. You have to make sure that you can afford the premium. You don't want to end up in a situation where you can't afford the premium. You need to be able to pick the right policy which is the best fit for you, which means you need to make sure you have all the options when you're picking a policy. If you need to choose between different
