What are you waiting for? Ripping your discs, whether audio discs or video discs, is an integral part of any backup routine. Ripping CD/DVDs is a great alternative to creating disc images via other disk burning software that's focused on burning discs, such as Nero Burning Rom, PowerDVD, or even Windows 7 or 8. Ripping via software is ideal in situations where you want to keep the disc under wraps. When it comes to DVD ripping, you can use a variety of software out there, such as DVD Decrypter, DVD Shrink, and Xilisoft DVD Ripper. DVD Decrypter is a free DVD ripper that's capable of ripping all the protected DVDs and you don't need to have special rights to perform that task. It's also a DVD backup tool that lets you backup discs and DVDs. There is a preview function included to help you select the rip settings. With the help of the tool, you can easily rip your DVD discs to files, along with other information such as chapters, languages, subtitles, and the audio and video track. DVD Shrink is a free software for Windows that lets you convert DVD to most popular video and audio formats for use with more compatible applications. It is very easy to use the software. There is a preview function included so you can select the settings for your DVD ripping. You also have the ability to trim the time of your DVD ripper, which is the feature that most users find useful. Xilisoft DVD Ripper allows you to rip all the protected DVDs and is compatible with all the versions of Windows (Windows 7/8/8.1). In addition, the program supports multitrack audio rips, to ensure that no sound
