"" Elden Ring is a unique fantasy RPG that runs smoothly thanks to the wonderful customization features that give you a fair chance of finding the perfect combination of skills." — Ry'cen "Elden Ring is a fantastic new IP that is both rich with content and unapologetically unique." — Tom's Indie Picks "" Elden Ring is a fantastic fantasy RPG that runs smoothly thanks to the wonderful customization features that give you a fair chance of finding the perfect combination of skills."" — Ry'cen "Elden Ring is a fantastic new IP that is both rich with content and unapologetically unique." — Tom's Indie Picks IN THE QUEST FOR THE PERFECT WEAPON: The world is full of Elden Rings. You must understand the balance between the Ring and Earth to prevent conflict between the two. The moment you touch the Ring, you begin to age by 15 years. Depending on the person, whether they are born as an Elden or one of the Twelve, the length of the aging process varies wildly. Some people can live for hundreds of years if they don't touch the Ring, and others are left withered and sick if they touch it once. The Elden Ring is the earth's only currency, so those who touch the Ring and survive are revered throughout the Lands Between. The true power lies in your touch of the Ring. The ability to lead an army and maintain an army are the only true power, and if you manage to be strong enough to not touch the Ring, then you will have the power to lead an army of your own. It is a fight for the lords, and you alone control your fate. THE POWER OF THE ELECTRIC KNIFE: All Elden Rings are constructed

by the great Demi-god known as the Gray Lord, Ela. The power of the electric knife is unknown by the Elden, but it acts on a different level from other weapons. The weapons you equip do not act on the same level, and you are free to acquire or reject your attributes, as you please. The weapon that changes with the highest level attacks in the strongest man-made elements, and you can add your own strength to your battle. The power of the electric knife is a weapon in its own right. THE FIRST L bff6bb2d33

Playstyle. The most effective playstyle is to control the entire world by adapting your character using the Adventure Points (AP) you have collected in the world. Moreover, you can strengthen your character's abilities and improve their skills by assigning AP to your character. You can keep increasing your strength, increase your stamina and intuition, improve your attack, and use magic. You can even learn new skills. Even if you don't assign AP to the respective skill, the game will let you learn it as a side effect. Please be aware that you must complete quests to assign AP to your character. Unit Control. In addition to controlling your character, your AP, and the actions of your allies, you can increase the AP and attack of your units by constructing buildings and combining units. If your units outnumber the opposing units, you can dominate the battlefield. All your units cannot move at once, so it is necessary to send them to outposts and rush their front line, to set a flanking attack or to wipe out the opposing units on a front line. The world is cut into countless single units. They differ in their strength, weapons, armor, and skills, so it's your job to strategically use these skills to manipulate the world. AI Challenge. You can use an AI to control enemies in specific situations in battles, and a strong AI can dominate battles. Also, you can increase the number of enemies using AI yourself. Horde: In a game, creating a large group is important to ensure that you always face a large group of enemies even after you have won. Co-op: Acquire resources and conquer a large area by cooperating with allies. While not controlling the action yourself, you can directly take advantage of allies' strategies. TUNING YOUR PLAYSTYLE Sending AP to units is the main core element of this game. There are three combinations of the three ways to do this. From Lager to Lager, as long as you have at least one AP that you can assign to your unit, then you can set the AP to 0. From Lager to Lager (in other words, 1 to 1), the number of AP to assign to your unit will be reduced. Lager to Lager (1 to 1), the number of AP to assign to your unit will be increased.
