USB Controller also displays the free and the total drive space. When a new device is connected, USB Controller places it in the 'Added' section. USB Controller Description: - My USB Viewer supports Windows 9x, Windows Vista, Windows XP, Windows 2000, and Windows Me. - It's so easy to use that it will take no time to use it. - It's different from other programs in the following ways: o It supports all sorts of portable media players, such as PlayGo, Kodak, Cas

What's New In?

- 'Expert Mode' - displays a list of every USB device connected and allows you to add, edit or delete them to the desired list. - 'Normal Mode' - displays a list of all USB devices and a list of all local drives connected to your computer. Local Drives are shown only if "Enable local drives" is checked. Click on device names to open the device in the default Windows Explorer Viewer. - 'Custom Mode' - allows you to create custom lists of USB devices or local drives and to open each device in the default Windows Explorer Viewer. - 'Duplicate Mode' - displays a list of USB devices from which you can copy and paste one or more entries. The selected device(s) will be added to the current list. - 'Total Space' - displays free and total space of all connected devices. - 'Get Drives' - downloads all the drives of a local computer to your computer if the computer has at least one connected USB device. It can be configured to automatically open MS Windows Explorer when a device is connected, the default option is checked. Version 3.61 The previous version, 3.60, contained a bug that prevented USB devices from being added to the USB Controller. This was fixed in 3.61. Version 3.59 The previous version, 3.58, contained a bug that prevented USB devices from being added to the USB Controller. This was fixed in 3.59. This version also fixed a bug that caused the "Get Drives" option to not work. Version 3.57 This version adds the ability to automatically open MS Windows Explorer when a USB device is connected. This option can be enabled in the "Defaults" section in the Windows Control Panel. Version 3.54 This version also adds a useful toggle "Update at start" to the "Defaults" section. When this option is enabled, USB Controller will automatically start when Windows XP or Windows Server 2003 is loaded. Version 3.48 This version corrects a bug that prevented USB drives and external USB hubs from being listed in the list of local drives. Version 3.47 This version corrects a bug that caused devices that were removed from the USB Controller to be listed again when the "Active Devices" list was opened again. Version 3.41 This version adds an option to display the free space of each USB drive and local disk

System Requirements For USB Controller:

Windows XP/Vista (32-bit and 64-bit), 2000, NT, 98, Me or higher. Mac OS X (10.4 or higher), and Linux (Debian). DirectX® 7.0 required. Additional Notes: Minimum System Requirements: Additional
