(Hi, my name is Aaron and I'm an aspiring game developer with a long history of messing around with computers and making little games. I used to spend my

time drawing pixelated pictures for the sake of it, but life has a funny way of getting in the way of that, so now I have a job. Although I get to draw pixel pictures, at my new job, I make them for money!)

*Thank you to Larry Page and Sergey Brin for giving me this opportunity to work for you! Also, a HUGE thank you to all of the parents, friends, and teachers who have supported me! It means the world to me! *

Hello. My name is Larry. We're the creators of the Google Play mobile games DragonVale: Holiday World, and Moon Buggy Racing. It's incredible to be here today to announce the official release of

the game, and with it, a new beginning. With the success of DragonVale: Holiday World, we've been able to work on the game at a whole new level and we're really excited to share what we've been working on with you. Hands-On at our SXSW Gaming Panel: After almost 7 years of building up our team and bringing the game to an incredibly successful launch earlier this year, it's time to take things to the next level. With the game free to play and having been so successful, we've had over half a million downloads on Android alone! But we couldn't rest on our laurels and have done so much in the last 6

months that we wanted to share with you. With the launch of the mobile game we've started to pave the way for a new game that is totally unique in the game space. Mobile gaming is where it's at now, and where it's going. A New Game and a New Beginning. Huge thanks to everyone who supported us along the way! It's been fantastic to bring the game to the players' mobile devices. We've shared an incredible journey with you and would never have gotten this far without your support. With over half a million downloads of DragonVale, we couldn't be more excited to get back to work and continue to build

upon the relationship we've established with so many players over the years. Let'
