**Licence Recovery My Files V5.2.1 1964 Fix**

[Download](#)

Its weird that your SD card was still readable after you formatted it though I know you formatted it twice. But Im still not 100% on how to do this. I can copy all of the data just fine. The problem is that some of the folders Im trying to open are still working, but the files are broken. I did a NTFS scan on the SD card and it says I have no errors, and the drive is 0% corrupt. Although I am 99.99% sure the drive I formatted it to is just fine. So im not sure what the problem is. I was hoping it would be simple and I would click a button and my files would be back. Maybe I just need the right tool? Anyways. Im going to stop writing now. I want to have dinner and actually do some things with my daughter again. But again, Thank you for your help! After 3 days of fixing Windows on my computer and my wife trying to help me on it, we thought we had a solution. So I did my usual format (I use HDD Data Recovery for this) and she can now find her files again. Now if I can just figure out how to set her computer back to normal. We all have file folder icons showing up, but only if I hover my mouse over them. I cant move them or add any files. Does anyone know how to fix this? I'm a rescue photographer and I had/have 2 acorn mini computer and an Olympus SD (FM III) system. I got rid of the computer and SD card took 2.5 GB to recovery so the recovery cost me \$300. I was trying to recover some friends, who said their SD cards were the only ones that would not work in their Nikon cameras. I had been using Photo recovery for 5 years and they only recovered their RAW photo files to a FAT 32 partition. Though Photo recovery, Tape C (my favorite), the Photo recovery, and the Elephant Share Elephant - Share all their RAW photo files to a FAT32! I was lucky I did not lose any of my photos. I started with our own photo's before moving up to a 1GB photo's were the files are all together. I have been doing full scanner/printing and enlargements for over 13 years and have this problem in the past.
