Extend your creativity with the new and improved touch-enabled Pen & Touch intuitive tools from Creative Suite 5. You'll be able to use your finger or pen to select, draw, text, copy, paste, and more, and you can even use the stylus to sketch quickly and easily create your masterpiece. Find the perfect punch, line, circle, or other drawing, freehand or vector, and quickly erase unwanted areas. CorelDRAW Graphics Suite provides a solid, interactive digital canvas for all of your drawing, painting and illustration projects. By default, when you view documents using CorelDRAW Graphics Suite X7, the user interface appears on the main screen and your new document appears in the viewer. The viewer can be found on top of the main screen. In the screen shot to the right, you can see the main screen. If your new document is in the viewer, you will see a pointer on the top-right corner of the viewer. Click and drag the pointer to move the viewer to where you want it to appear on the main screen, or close the viewer and all you see is the main screen. You can find options at the bottom of the viewer window. You will see a File menu and two View menus. Click File to exit the viewer and return to the main screen. The Files Viewer allows you to work with multiple files at once, but the File Menu will only open the first file in the list. Use the View menu to toggle between the three viewing modes: Painter, Knife and Pen. In the Painter mode, you can see a preview window on your screen. You can use an onscreen pen and brush to draw directly on your screen, freehand or vector.
